

# CONCEPT MAPPING

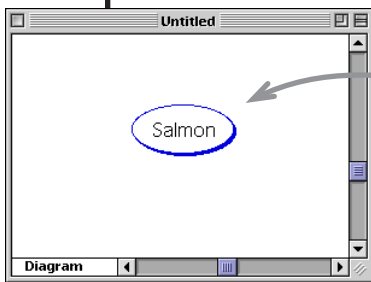

## When to use it

- You want to see how the ideas fit together.
- You want to show your understanding to others.

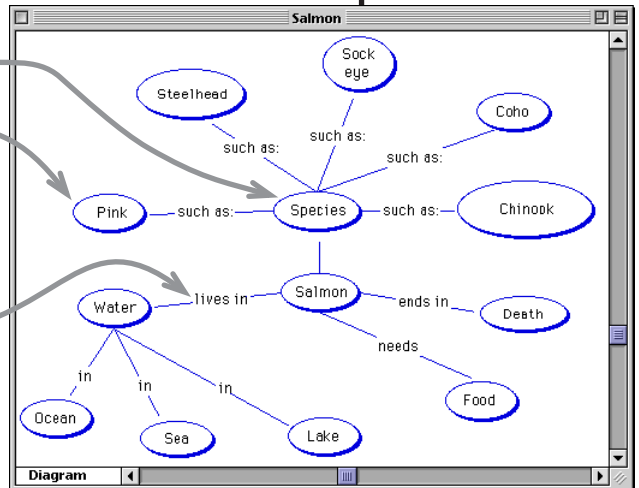

## How to do it

1. Put the main idea in the first symbol.

2. Let related ideas come from each symbol.

General or "big" ideas lead to more specific or "smaller" ideas.

3. Use linking words to show how the ideas relate.

4. Make the map say more by choosing pictures for symbols, etc.
